## Inkjet Matte Photo Paper, 230gsm

Properties	Specifications
<b>Material</b>	61# matte, neutral white paper
<b>Gauge</b>	9.5 mil 230 gsm +/-5
<b>Gloss Level</b>	> 98
<b>Whiteness</b>	>95
<b>Environmental</b>	FSC®-certified paper
<b>Printer/Ink Compatibility</b>	Dye/pigment
<b>Software Setting</b>	The bond or uncoated paper setting in most RIPs is appropriate; however, we recommend a custom ICC profile for optimal results. Please refer to <a href="http://www.brandmanagementgroup.com/profiles">www.brandmanagementgroup.com/profiles</a> for starting-point ICC profiles
<b>Light Fastness</b>	The fading time of inkjet ink is a direct result of the inks that you choose to use and the environment where the print is displayed. Contact the ink manufacturer for light-fastness data.
<b>Finishing/Post Processing</b>	No post processing or finishing is required. A clear fixative may be applied to enhance certain areas of the print. We recommend waiting 24 hours before placing the print behind glass.
<b>Handling Recommendations</b>	Due to the absorptive nature of the coating, you should avoid touching the coated surface of the paper. It's always recommended that cotton gloves be used when handling inkjet coated materials. Rolls of Kodak paper and film are supplied with the coated side facing out.
<b>Ideal Storage Conditions</b>	70° F (21° C), 50% R.H. (a controlled environment is recommended); store in original packaging.
<b>Shelf Life</b>	1 year from the BMG ship date when stored in proper conditions.
<b>Optimal Service Environment</b>	72° F (21° C), 50% R.H. For end use: 0-300° F
